LeetCode: leetcode.com/u/waghmarem539

SKILLS

Languages: Java 11, Java 17, Java 21, Golang, SQL, Python, JavaScript
Backend: Spring Boot, Spring Core, Spring MVC, Spring Security, Spring Data JPA, Spring Cloud, Hibernate, JPA
Frontend: React JS, HTML, CSS
APIs and Security: REST, GraphQL, SOAP, API Integration, JSON, XML, JWT, OAuth2, APIGEE
Messaging: Apache Kafka, RabbitMQ
Databases: PostgreSQL, MySQL, Oracle, MongoDB, NoSQL, Redis
Cloud and DevOps: AWS, ECS, Docker, Kubernetes, OpenShift, Jenkins, CI/CD, Maven, SonarQube, Git, GitHub
Architecture and Practices: Microservices, Monolithic Architecture, Scalability, HLD, LLD, OOP, SOLID Principles, Design Patterns, Data Structures and Algorithms, Agile, SAFe Agile
Testing: JUnit, Mockito
Generative AI: LLM-based Applications, RAG Pipeline, Prompt Engineering
Tools: Postman, IntelliJ IDEA, Eclipse, Jira, Confluence

EDUCATION

Bachelor of Technology, Computer Science
Dr. Babasaheb Ambedkar Technical University, graduated July 2022

EXPERIENCE

Java Full Stack Developer, Light & Wonder, Pune
December 2022 - July 2026

- Built and maintained 50+ backend microservices in Java, Spring Boot, Hibernate and JPA on MySQL and PostgreSQL.
- Co-rebuilt the application on a modern Java stack, reducing infrastructure and operational costs by 40%.
- Built REST and GraphQL APIs and added Kafka-based asynchronous processing for selected backend workflows.
- Containerized 10+ services with Docker and supported Kubernetes-based deployments alongside the DevOps team.
- Optimized SQL queries on PostgreSQL and Oracle, improving API response times by 20-30% in key modules.
- Implemented authentication and authorization with Spring Security, JWT and OAuth2.
- Streamlined release and deployment through Jenkins and Maven CI/CD pipelines.
- Developed and deployed cloud-hosted application workflows in AWS environments.
- Resolved 200+ production issues and tuned performance, using SonarQube to improve code quality.
- Led 15+ features from design through deployment in Agile and SAFe Agile teams, planning sprints and documenting designs in Jira and Confluence.
- Mentored junior developers and reviewed code to improve maintainability and adherence to engineering best practices.
- Prototyped Generative AI applications in Python using RAG pipeline concepts and prompt engineering for internal productivity use cases.
- Recognition: Star of the Team (Nov 2023); Team of the Month (March 2024, Nov 2025).

PROJECTS

Transportation Management System (Java, Spring, Hibernate, MySQL)

- Built a system for truck owners and load providers to manage load bookings, truck allocation, booking history and freight cost calculation.
- Designed REST APIs and optimized database interactions for load and booking data.
